

Custom Engineered Agitation Solutions

This MixPro™ line of top entry gear drive agitator provides end users with a more cost effective alternative to the competition's typical helical geared units. The reducers utilize non-proprietary worm gearing which is specifically designed for reliability and versatility in high production environments. The compact design of the worm reducer provides a low profile for installation into space restricted applications. As with all MixPro's top entry equipment, the GTW series utilizes process matched wet ends for optimum agitation solutions.

This established MixPro™ design is widely recognized by industry as a leader in top entry agitation equipment.

Built to handle the toughest environments MixPro™ agitators have proven themselves time and again in high production manufacturing environments where quality and performance are paramount. Our quality assurance process tests every mixer to withstand the harshest conditions and perform to specification.

SERIES OF TOP ENTRY AGITATORS

GTW

Features & Benefits

- The agitator drive is comprised of a non-proprietary reducer which utilizes worm gearing to provide a variety of output speeds.
- The compact design of the reducer housing enables installation into space restricted areas.
- The worm drive has an inherently high shock load capacity over other forms of gearing.
- Worm gearing provides for smoother operation than most alternative forms of gearing.
- The agitator drive head is available in a variety of configurations, matched to the application (ie. flange mount, plate mount, with seal, without seal, etc.).
- OSHA guarding is standard for increased safety.
- Readily accessible lubrication and inspection points are incorporated into the design for increased maintenance serviceability.

Applications

Pulp & Paper

- Stock Prep Systems
- Recovery Systems
- Coating Systems
- Effluent Treatment

Mineral

- Precious Metals (gold & silver)
- Base Metals
- Effluent Treatment
- Cyanide Destruct

Non-Metallic Minerals

- Clay
- Calcium Carbonate
- Titanium Dioxide

Chemical

- Paints & Pigments
- Edible Oil
- Starch
- Petro-Chemical
- Alcohol Production
- Building Products

Wastewater/ Water Treatment

- Flocculation
- Chemical Blending
- Flash Mixers
